PERSONAL STATEMENT

Qualified, reliable and adaptable Environmental Professional and Sustainability Consultant with a broad knowledge of delivering environmental projects in environmental management systems, sustainability, harmful emission, waste and other environmental matters. Livhuwani's mission is to accelerate transition to a circular, sustainable economy, climate change adaptation and resilience, ecological restoration and leave a long-term societal impact. Develop sustainability concepts where people thrive, build, do business consciously, lead with compassion and where our production is based on circularity and design inspired by nature. Has a very hand on approach to her duties and is able to take on a role that is continuously growing in complexity and levels of responsibility. On personal note, she is a well-presented, articulate and diplomatic individual capable of building, nurturing networks at executive and operational level and comfortable at making sometimes difficult decisions and taking ownership of key issues.
